

# THE SEED SURVIVAL RACE

How many seeds are produced by a plant. Often it is many hundreds. Why do they need so many? Play the Seed Survival Race and find out! You will need 30 small seeds like cress or mustard.

**START**

Begin again with 30 seeds

Weed killer! Lose 5 seeds.

Snails eat the seeds!

Caught plant disease! Lose 3 seeds.

Extra turn. Seeds growing well.

2 seeds would not grow.

Lose 4 seeds, they fell on fence.

Lose 3. Washed away by rain.

Seeds weeded. Lose 6 seeds.

Move 3 places. Sunny Day!

Foot Squelch! Lose 3 seeds.

No rain. Lose 4 seeds.

Insects eat 4 seeds!

Grass too tall! 2 seeds smothered.

Football squashes 1 seed!

In bud! Extra turn.

**Home and grown!**

You need 30 "seeds" each, a coloured counter for each player, a dice and a cup. Throw the dice and away you go! As you lose seeds, put them in the cup. The winner is the first person to be, "**Home and Grown!**"
